2016 ICOM MILANO
24TH GENERAL CONFERENCE - 3-9 JULY 2016 - ITALY
ECOMUSEUMS AND COMMUNITY MUSEUMS FORUM

with the support of:

SITdA
Società Italiana della Tecnologia dell'Architettura

A NETWORK OF COLLABORATIONS

The Ecomuseums, in accordance with Regional Law 10/2006 have created a network, at a regional level, for the purpose of optimizing resources, of favouring the exchange of experiences and of transferring best practices. These are also opportunities for comparisons and debates on issues and problems regarding the ecomuseum model that is considered as a privileged instrument of sustainable development for the territory, for planning common initiatives and actions to be undertaken at a local, regional and national level, of becoming a qualified spokesperson for improving regional policies in the sector. The network is flanked by the ERPAC -Regional Body for Cultural Heritage-Cataloguing, Vocational Training and Research Office that carries out the investigation activity referred to applications for recognition and funding, it supports the activities and projects of the ecomuseums through collaborations with cataloguing and research campaigns, ensuring the technical-scientific support in preparing projects, putting forward training and editorial initiatives.
