European Network of Ecomuseums

Why do we want a network?

To have a common forum for mutual interests, knowledge, information and sustainable development of ecomuseums in Europe;
to produce interactions, stimulate creativity, to provide practical opportunities, inspiration and new ideas;
to encourage and enhance one another.

What shall we do in it?

We shall cooperate over the borders, promote and develop the idea of ecomuseums;
we shall make ecomuseum practices circulate;
we shall exchange ideas, experience and knowledge resources by mean of ICT and learning journeys.

Which are our needs?

We need to learn and share experiences, build relations and make friends in other countries for future cooperation and projects;
we need the experience of people directly involved in field practices;
we need a friendly environment to make the exchange effective and joyful;
an idea of museology respectful of the places and their inhabitants but also of diversities inside and between the communities;

Which are the benefits?

Friendship, partnership, common activities, common website and mutual support;
a wider provision of knowledge resources, suggestions, inspiration;
a better local reputation and recognition of members.
